1. Test Summary

1.1 Scope of Testing:

The primary objective was to ensure the functionality, usability, and compatibility of the “Booking.com” Company's website.

This included testing the following main Modules :

- הרשמה
- כניסה לחשבון
- תכנית נאמנות Genius
- הזמנת אירוח בחו"ל
- השכרת רכב + הצעות מיוחדות
- מוניות מ/אל שדה התעופה
- אטרקציות
- החשבון שלי -> להשלמת הפרופיל -> התאמה אישית + אמצעי תשלום + ניהול מידע ופרטיות
- תמיכה
- בחירת שפה (אייקון דגל ישראל)
- בחירת מטבע (אייקון ILS)
- החשבון שלי -> להשלמת הפרופיל -> פרטים אישיים + הגדרות אבטחה + נוסעות ונוסעים אחרים
- הזמנת אירוח בארץ
- טיסות (בארץ + בחו"ל)

1.2 Testing Period:

The testing was conducted over One sprint that lasted two weeks, from 03/12/2024 to 17/12/2024.

1.3 Testing Environment:

Tests were carried out on the “Testing environment” of the website, mirroring the production setup.

Browsers included Chrome, Firefox, and edge on desktop and Safari on mobile platforms.

1.4 High-Level Results:

- A total of 43 test cases were executed:
with 40 passing, 3 failing,

2. Testing Activities

The Test Activities section details the comprehensive and methodical approach undertaken to evaluate the functionality, and user experience of the “XYZ Electricity Company website”.

This phase involved a series of targeted tests types designed to rigorously assess each aspect of the website, ensuring reliability and quality from the user’s perspective.

The following Testing Activities were performed in this sprint/s:

2.1 Smoke Tests

Over the course of the sprint, no failed smoke tests were detected.

2.2 Functional Testing

all functional testing has been conducted, confirming that all features and modules are operating as intended.

2.3 User Interface Testing

Our user interface testing has confirmed that the overall user experience aligns with our high standards.

3. Results and Findings

This section presents the key outcomes of our testing efforts on “Booking.com” website.

Here, we will present the important **metrics** that will be highlighting both the strengths and the areas needing attention.

These Metrics will provide a comprehensive understanding of the current state of the website's functionality, usability, and overall performance.

3.1 Test Execution:

- **Executed:** 43 test cases (100% of planned)
- **Passed:** 40 (93%), Failed: 3 (7%)

3.2 Defects Logged:

- **Total:** 3 defects (Low: 3)
- Open: 3

3.3 Requirement coverage:

- 100% of the requirements covered

4. Open Issues, Risks and Go No Go

On this section we will present the unresolved critical issues and the potential risks that emerged during our testing process.

In addition to that we will outline here our Go No Go recommendation on whether the current state of the website aligns with our quality standards and criteria for going on “Live to Production”.

4.1 Unresolved Issues:

4.1.1 Critical Payment System Bug:

Description: Confirmation emails not sent after bill payment.

Impact: High - Affects user confidence in successful transactions.

Current Status: Under investigation by the development team.

Risk: Could lead to increased customer support calls and dissatisfaction.

4.1.2 Performance Concerns:

Description: Occasionally users experience slight decrease in response time.

Impact: High - Affects user experience.

Current Status: Waiting for investigation by the development team.

Risk: Could lead to customer support calls and dissatisfaction.

4.1.3 Mobile Responsiveness:

Description: UI misalignments on mobile devices in landscape mode.

Impact: High - Affects user experience on Mobile.

Current Status: Scheduled for UI design review.

4.1.4 Go No Go Recommendation:

After thorough analysis and considering all test results, we recommend a 'Go' decision for the release of the “Booking.com” website.

Our testing experience indicates that the system is quite stable and performs well overall.

We acknowledge the presence of open issues and propose releasing them as known issues to the end-users, with a commitment to addressing them as soon as possible through immediate hotfixes."
